## **Specific Details of this Auction**

*The auction will last less than 30 minutes - be there on site or bid online!*

Purpose Wrecker Sales, one of the preferred distributors of towing and recovery equipment in North America, had a fire last year. A used unit sparked and caught fire and thus caused damage to seven units. In order to complete the process of going through the insurance process and ultimate liquidation of these, these seven units must be sold through this auction. One of the units has significant damage to hubs and some hydraulics - specifics are listed for each item - but most only had slight heat and soot damage yet are also required to go through this process. Due to insurance regulations these trucks will carry "salvage" titles even though some are basically "new" (a couple are used). For this same reason Purpose nor Blackmon are able to offer any warranty on these items. Most components were not damaged (engines, transmissions, etc.) and therefore are likely available for warranty - Blackmon nor Purpose can guarantee that but can advise. Purpose Wrecker is cleaning and polishing what they can but are leaving the damage visible for the buyers to inspect - they will not fix the hydraulics on one of the heavys nor the hubs so you can see for yourself, and on most of the rollbacks the only damage was some warped visors and stained light bars which you will be able to see. Inspections are welcome. Please contact us for an appointment and feel free to come by anytime Purpose is open! See you at the auction for this bargain opportunity AND if you prefer to buy a great wrecker or rollback without a salvage title the great sales staff at Purpose will be more than happy to serve you as they have for thousands of customers all over the world since 1981! See You There!

Online you will find many photos of each truck along with chassis specs and images of titles
